

Exploration and Presentation Assignment 2

Task 1

Frederik Blem

March 9, 2021

1 Finding Requirements of Bachelor Thesis

I first searched on Moodle under "Mit studie SOFT" and reached the page: <https://cphbusiness.mrooms.net/course/view.php?id=746#section-8>, which has the recommendations and requirements pdf that I will base my work upon. Furthermore on section-1 of "Mit studie SOFT" you can reach the Curriculum Software Development pdf document with official requirements for the bachelor project on page 17.

2 Requirements for the Project and the Report

2.1 Curriculum

The curriculum is listed in the aforementioned curriculum document.

2.2 The Project

In the recommendations and requirements pdf the following rules, recommendations and explanations are laid out:

- Strive to **include elements from courses passed**.
- Group size is **maximum 4 students**. Larger groups carry larger expectations.
- The 15 ECTS points the project covers should amount to **412.5 hours** of project work.

2.3 Report

As before, the Report requirements are found in the recommendations and requirements pdf.

- The maximum page count for the report is:
 $maxPageCount = 40 + 20 \cdot numberOfStudents$.
 Meaning that a single student can write up to 60 pages and two students can write 80, etc.
- The report can be written in either **Danish or English**.
- The report **must** contain a thorough description of the work that has been done during the bachelor project, as well as an evaluation and reflection on the work.

The requirements of the report were addressed here, while the recommendations will be followed in Task 2.
